Please send us product brochures on the following damper actuators:

LM... NM... SM... AM... GM... LF... AFR... Electrical accessories

Please also send information on:

- Motorized fire and smoke dampers
- Variable air-volume control (VAV-Control)
- Rotary-motion actuators and valves
- Linear-motion actuators and valves

Note

Using BELIMO damper actuators

The actuators listed in this catalogue are intended for the operation of air dampers in HVAC systems.

Torque requirements

When calculating the torque required to operate dampers, it is essential to take into account all the data supplied by the damper manufacturer concerning cross sectional area, design, mounting and air flow conditions.

p0017805

Dampers up to approx. 3 m²

**Open/Close actuator
(AC/DC 24 V)**

**Manual operation with
integral position stop**

Versatile applications

The AF... spring return actuators are intended for the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

Improved functional safety

The AF ... actuator moves the damper to its normal working position while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

Variable end switch

The AF24-S actuator has one fixed auxiliary switch and one adjustable auxiliary switch which allows angle of rotation of 5% and between 28...94% to be signalled.

Simple installation and commissioning

The actuator is fitted with a universal spindle clamp for quick and easy mounting directly onto the damper spindle. The actuator is also supplied with an anti-rotation strap for fixing it in position. The damper can be operated manually and fixed in any required position. Release of the locking mechanism can be achieved manually or automatically by applying the supply voltage.

Manual operation with integral position stop

Versatile applications

The AF... spring return actuators are intended for the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

Improved functional safety

The AF 230 actuator moves the damper to its normal working position while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

Application

The ZG-AF mounting accessory is used for fitting this type of spring return actuator and for actuating safety dampers when it is impossible to mount the actuator directly on the damper spindle.

Kit specification

- ① – Front mounting bracket
- ② – Rear mounting bracket
- ③ – Crank arm AF
- ④ – 2 ball joints KG8
- ⑤ – 4 mounting brackets
 - 2 screws M6 x 16
 - 2 screws M6 x 65 with nuts
 - 5 self-tapping screws
- ⑥ – Universal crank arm:
order separately, not included with the ZG-AF mounting accessory.

Flat mounting (Fig. 1)

The spring return actuator is attached to the air duct by means of the two brackets.

Side mounting (Fig. 2)

In this case four identical brackets are used for attaching the actuator instead of the other two brackets.

Linkage mounting (Figs. 1 and 2)

A slotted lever (KH8) is substituted for the U-bolt in the shaft adaptor of the spring return actuator. A second slotted lever is attached to the damper spindle. The rotation of the actuator is transmitted to the damper spindle by means of a connecting rod and two ball joints bolted to the slotted levers.

Innovation, Quality and Consultancy: A partnership for motorizing HVAC actuators

Air applications

Standard actuators and spring-return actuators for air control dampers in HVAC systems.

Safety actuators for motorizing fire and smoke extraction dampers

VAV systems for individual room air control

Water applications

Mixing actuators and motorized ball valves for HVAC water circuits

Globe valves and intelligent linear actuators – also for leading makes of valve
